BROCHURE

oibase.nl/en/beveiliging.html

Apply for security passes straight from Oibase

No more loose emails with attachments that are just not right. Upload the documents per employee and send the application with one click to the Korpscheftaken team (special laws) of your police unit.

- For each pass (green, grey, blue, orange or yellow), Oibase shows exactly which documents are needed.
- Photos are automatically converted to the PDF or JPG the police ask for.
- The email gets the right subject line and clear attachment names. You receive a copy.
- Oibase warns you 3 months before a pass expires, and when a pass still has to be handed in after an employee leaves.

Sound familiar?

Then it's time to do things differently.

Sick call at six in the morning

Within two hours someone has to be at the site. With Oibase you open up the shift and a colleague picks it up in the app. It's immediately under their name.

Adding up hours per site

Sorting out hours per client at the end of the month and making the invoice. Oibase creates the timesheet and the invoice with one click, including allowances and VAT.

An expired security pass

You only notice when it's too late. Oibase shows per employee which passes and diplomas are about to expire.

You see your night shifts, site and pass at a glance

Employees open the app and immediately see where they're posted: which site and which times. You see when a security pass expires. Swapping works through a request, and you approve.

- ✓ Works on any phone, no app store: put Oibase on your home screen
- ✓ Notification on your phone as soon as your schedule changes
- ✓ Hours flow automatically into the timesheet

What Oibase does for you

Schedule, hours, leave and payslips in one place. No separate systems.

Schedule per site

Plan per client and site, and copy a fixed week with one button.

Open shifts and swaps

Your team swaps by themselves. Whoever takes over a shift appears straight in your schedule.

Timesheet and invoice

Per client, accurate to the cent, with allowances, VAT and payment term.

Payslips with ORT (irregular-hours allowance)

Regular hours, irregular-hours allowances and overtime in one payslip, in your employee's mailbox.

Two collective agreements (cao) per employee

Choose per employee the cao Particuliere Beveiliging, the cao Evenementen- en Horecabeveiliging, or both.

Working with freelancers (zzp)

Freelancers accept shifts themselves, may hand them back and get an overview of hours × rate.

Certificates at a glance

Per employee you see which certificates there are and when they expire. For your industry these are already set up:

Security pass (ND)

BHV diploma (emergency response)

First aid certificate

VCA Basis

Your cao and allowances

For each employee you choose which cao applies: the cao Particuliere Beveiliging, the cao Evenementen- en Horecabeveiliging, or both. Contracts and payslips follow that choice. You set the allowance percentages once under Settings.

Reporting in the field? Use Oisecur

Oisecur is the reporting app from Oibase B.V. Your guards create shift reports, incident reports and patrols with QR checkpoints. Your client receives a PDF with photos, signature and their own logo. In Oibase there is a button that takes you straight there.

Sweden	109.84 kr + 24.41 kr	183.06 kr + 36.61 kr	305.10 kr + 48.82 kr

Prices per month, excluding VAT. Each country pays a price that fits its local price level. Prices are indexed every 1 January.

About Oibase

Oibase is scheduling software for businesses that work in shifts. Schedules, swaps, hours, leave, timesheets, invoices and payslips are in one system. Your team uses the app on their phone, without an app store.

Built by Hendrik Zuurman, who worked in the security industry for 24 years. Oibase was made from practice, with firm rules you can rely on.

- ✓ Data stored in the EU
- ✓ Data processing agreement included
- ✓ Pay by invoice, no automatic debits
- ✓ Cancel monthly

How to start

1. Create an account at oibase.nl
2. Add your employees
3. Build your first schedule. Your team sees it in the app right away
